SUMMARY

Application developer with a strong background in Web, specializing in creating immersive 3D experiences using Three.js. Currently pursuing a bachelor's degree in computer science at Algoma University. Proficient in HTML, CSS, JavaScript, and the React framework, with a focus on prototyping and user testing. My portfolio showcases my commitment to learning and growth, as well as my passion for leveraging innovative technologies to craft engaging and user-centered experiences.

EDUCATION & QUALIFICATIONS

Algoma University

May 2022-Januray 2025

Bachelor of Computer Science-Internet Tools, Interaction Design and Testing-Human Computer Interaction, Software Engineering, Introduction to Computer Graphics, Data Structures, System Analysis, Theory of computation.

KEY SKILLS

Technical Skills:

- Programming Languages: HTML, CSS, JavaScript, Java
- Frameworks & libraries: React, Three.js
- Databases: MySQL, MongoDB
- Version Control: Git
- Runtime Environment: Node.js
- Networking & Security: Computer Networking, Operating Systems, IT Security, CLI
- UI/UX Design: User-centered design principles and practices (Wireframing, Prototyping, User Research)
- Design Tools: Figma, Photoshop, draw.io
- Software Development Life Cycle: Understanding of SDLC processes

Transferrable Skills

- Communication: Developed strong verbal communication skills, facilitating clear and friendly interactions with guests and team members.
- Time Management: Consistently met all deadlines while effectively prioritizing tasks and managing time, successfully balancing full-time work and studies.
- Problem-Solving: Experience in quickly and effectively resolving customer complaints and conflicts through my role as a server.
- Collaboration: Collaborated with classmates and colleagues to maintain smooth workflows and deliver excellent results consistently on time.
- Attention to Detail: Ability to follow complex instructions accurately, ensuring quality in both service and academic assignments.

WORK EXPERIENCE

Bartender/Server | Nam's Hakka Cuisine**Apr 2023 to Present**

Restaurant

- Prepared and served a variety of cocktails and beverages while delivering excellent customer service and maintaining a clean and organized bar area.
- Awarded Employee of The Month for exceptional service and team contribution.

Server | Hakkalicious

May 2022 to Apr 2023

Restaurant

- Provided exceptional customer service by accurately taking orders, delivering food and beverages, and addressing guest inquiries to ensure a positive dining experience.
- Trained new staff members in restaurant procedures and customer service standards

PROJECTS & ADDITIONAL INFORMATION

Created a landing page for ALCOMS, collaborated with a team of developers to create an engaging landing page for ALCOMS, the computer society at Algoma University. Designed to showcase events and resources, the page informs and connects the community. Utilized React to build a dynamic, user-friendly interface that enhances overall user experience and interaction.

Built a full-stack website to implement and test CRUD (Create, Read, Update, Delete) functionalities, enhancing my understanding of web application architecture. (MERN stack)

Built a personal website to showcase my portfolio, skills, and achievements throughout my academic journey. Built with React, the site provides an interactive and visually appealing platform that highlights my work and reflects my growth as a developer.

Created an Interactive 3D maze using WebGL and Three.js, demonstrating my skills in 3D graphics and interactive design. This project showcases my ability to craft immersive environments that engage users and enhance their experience.

COVID-19 Accessibility App, designed to provide crucial health information while prioritizing usability for individuals with disabilities. By incorporating sound cues and haptic feedback, the app ensures users receive important updates through auditory notifications and tactile alerts. An intuitive interface with large buttons and voice navigation further enhances accessibility, allowing seamless interaction for users with visual impairments. Prototyping involved creating interactive designs and conducting user testing to refine features based on real-world feedback.

Developed A Mini Compiler, (lexical and syntax analyser for a compiler) including regular and context-free grammars, DFA for token recognition, and support for integers, real numbers, operators, and C/Java-like variable naming.

Training/Certifications

- JavaScript Foundations Professional Certificate by Mozilla [2024]
- Google IT Support Professional Certificate [2024]

Languages

English -Fluent; Hindi -Fluent; Nepali -Fluent.

INTERESTS

Apart from Web Development, I have a strong interest in gaming, reading fantasy novels, and exploring manga, which immerses me in the worlds crafted by talented authors. Experiencing these carefully woven stories provides me with new perspectives and fuels my creativity, inspiring my own work.
